COMLUX SELECTS ONAIR FOR A320 PRESTIGE

Richard Gaona (left), chairman and president of Comlux Aviation, and Benoit Debains, CEO of OnAir, signed an agreement at EBACE yesterday that will see OnAir's in-flight mobile communications service, which uses Inmarsat SwiftBroadband, installed on an Airbus A320 Prestige. It will allow passengers to stay connected in flight, including accessing the Internet using their own mobile phones. The work will be carried out at the Comlux America Completion Center in Indianapolis, Indiana. ■
